"I was a student of Larry's at University of Phoenix for the class of BSA310. The class material was dry and slow but Larry was able to make the class enjoyable and educational for everyone. During the class Larry was always professional and very courteous. All schools should have instructors like this and all instructors should strive to learn to teach the way Larry does; compassionate about teaching and goes out of his way to ensure his students learns the material."

"Larry was my teacher at the University of Phoenix for Web Design. He is hands down the most passionate teacher I have ever had and strives for continuous improvement in his teaching skills by obtaining feedback and implementing the correct strategies to ensure that his students retain the information that he provides. He truly cares about each of his students. He gave me resources that I knew nothing about that have already helped me to make my web design business better. I highly recommend Larry as a great source for web design information and more importantly a professional Teacher. People like Larry are far few and in-between. We need more like him to make a better future for our country."
